Experience

Plasbit (Warsaw, Poland remote)

October 2022 -

Software Engineer, Remote | **Docker, Meteor, Python, Pinecone, Langchain, OpenAI, NLP**

- Developed a dynamic web application using JS, Python, and React to streamline service appointments, sales, inventory management & appointment scheduling process at an automobile sales & service center.
- Engineered and fine-tuned a firestore NoSQL database structure, performing comprehensive analysis to improve ease of access, driving 50% decrease in data traffic fees.
- Leveraged NodeJs and GCP to create a scheduling system to accommodate service providers, eliminating time zone issues and reducing scheduling conflicts to zero.
- Launched a comprehensive financial system using RESTful APIs to support multiple payment methods to ensure a secure user payment experience.
- Facilitated a front-end business logic analysis, code views, unit testing, using Mocha during the beta, reducing feature development completion time by 35% and decreasing weekly bug reports by 80%.

Deloitte (Toronto, Canada remote)

October 2018 - September 2022

Software Engineer, Remote | **Node, Express, GraphQL, Apollo GraphQL, Vue, TailwindCSS, AWS S3, Trello, Jira**

- Developed and maintained open source React and NodeJs applications.
- Utilized GraphQL to **streamline CURD operations, enhancing website performance by 30%** in my way by optimizing loading speed.
- Completed and launched an SPA application from scratch based on reference books related with **React, Redux, Webpack and GraphQL**.
- Leveraged **sequelize** package to convert mysql to mongodb for big database.
- Refactored and maintained the old project for well-structured and scalable project.
- Refactored Restful API to GraphQL and implemented them on local environment instead of remote environment.

Leoni (Brasilia, Brazil on-site)

December 2014 - September 2018

Full-Stack Developer | **PHP, Javascript, Typescript, Coffeescript, Laravel, React, RestAPI, Bootstrap, MongoDB, MySQL, Git, SVN**

- Developed **real-time, 100+ responsive interactive web pages** using Redux framework with React components, ES functions, ant-design, Material-UI, and TailwindCSS.
- Developed 30+ responsible mobile-kindly pages using React, GSAP.
- Refactored Javascript of ReactJs and NodeJs to Typescript by implementing Vite instead of Webpack.
- Centralized past sales data by developing a sales microservice using python, Microservies, Javascript, React to enable real-time updates & easy visualization of progress for tracking individual & business goals.

Leadership & Projects

Plasbit

November 2021 - March 2022

Populated Centralized Cryptocurrency Exchange Platform

- By developing the centralized platform for decentralized cryptocurrencies, the exchange of various cryptocurrencies along with large crypto assets has become much easier than before.
- Existing projects built solely by Meteor and Mongodb have become more scalable by dividing them into front-end and back-end parts.
- The security of the platform has been strengthened by adding all verification features such as 2fa, identify verification, phone, email.
- Keeping the high-quality code and high-speed project by workflow system, testing process and regular realizing product system.
- Released the sub-projects for advertising with different programming languages such as PHP, Node, react and tailwindcss.

Chatify

June 2016 - June 2018

Flexible User Realtime Web Chat Application

- Developed a personalized chat room similar to Discord, facilitating resource sharing and engaging in lively conversations with friends employing React.js and Firebase technologies.

Education

University Of Brazil

April 2011 - October 2014

Bachelor of Science, Software Engineering

- 8.42/10
- I graduated with Software Engineering degree in the University of Brazil, have experience with a lot of different programming languages, mostly php, javascript, c# and c++.

Skills

C++/C#	Laravel	React/Next	RESTful APIs	Docker	Git
PHP	Node/Express	Vue/Nuxt	GraphQL	AWS S3 Bucket	Trello/Jira
Python	Python/Django	Tailwind/Anntd/Material	Apollo GraphQL	Mongo Cloud	Hub Stuff
Js/Ts	AWS/Mongo Cloud	GSCP			

Awards

- 2021 | Competent Leader & Competent Communicator Awards, Two-time Club level Champion Speaker | Toastmasters
